Red-Team Test Results

Project: Hostel Maintenance Ticket Sorter

Name: Akilesh D | Reg Number: 2603717673721007

These tests run the Python rules directly, without the AI. Each test was run twice with the same result.

Test	Type	Input	Expected	Actual	Result
1	Shouting complaint	"URGENT!!! Slow drain in B214 PLEASE FIX NOW"	urgent = False	('plumbing', False)	Pass
2	Mistyped room	Room B214, complaint says "B-214"	None (needs_info)	None	Pass
2b	Room not written in complaint	Room A105, complaint says "room 5"	None (needs_info)	None	Pass
3	Same complaint sent three times	"Fan not working in B214" (run 1, run 2)	Same key every time	('electrical', False) both runs	Pass

Note: Test 3 checks that the same complaint gives the same (room, issue) key. Duplicate joining into one ticket happens in process_all() and needs the full AI run to test end to end.
