Eval Harness Results

Project: Hostel Maintenance Ticket Sorter

Name: Akilesh D | Reg Number: 2603717673721007

Five test complaints from complaints.csv. Expected values come from the spec. Actual values are shown only where the AI service returned a result during testing; rows marked Not run were not completed because of the free daily quota and Google service outages.

ID	Complaint	Expected (room / issue / urgent)	Actual	Result
H03	Sparks coming from the switchboard in A105. Burning smell	A105 / electrical / True	Not run (AI service unavailable)	Not run
H04	Room B214 fan still not working. Please fix	B214 / electrical / False	Not run (AI service unavailable)	Not run
H09	URGENT!!! Bulb in room A102 is fused	A102 / electrical / False	Not run (AI service unavailable)	Not run
H11	E210 door lock broken	None (needs_info) / carpentry / False	Not run (AI service unavailable)	Not run
H15	Got a small shock touching the iron box plug in B318	B318 / electrical / True	Not run (AI service unavailable)	Not run

Other AI results from testing, for reference: H01 returned B-214 / electrical / False; H06 returned C305 / internet / False; H12 returned D204 / plumbing / True. These show the AI call works, and that Python rejects B-214 at the room check.
